Cold Plasma Technology™

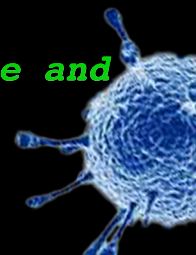

ClimaTemp's "Patent Pending" Cold Plasma line of portable air conditioners are the first in the industry to utilize Bi-Polar Ionization Technology. This technology utilizes active purification by creating and releasing millions of positive and negative oxygen ions into the air. These ions seek out and attach to pathogens such as viruses, causing a chemical reaction on the surface of the cell membrane. This deactivates the viruses, rendering them harmless, so they can no longer spread or cause infection.

Due to the small size of viruses, many filtration technologies are unable to trap viral particles. As bipolar ionization is non-selective, it offers a unique and safe solution to kill airborne viruses 24/7, helping to reduce the risk of disease and infectious outbreaks.

ClimaTemp's Cold Plasma line of portable air conditioners eliminate these pathogens including viruses, bacteria, fungi, and mold as well as Volatile Organic Compounds and odors generated by cooking, smoking, and cleaning.

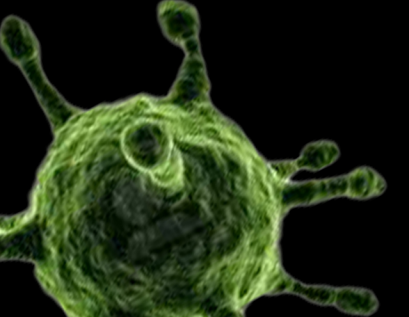

With overall safety in mind, Cold Plasma Bi-Polar Technology is Ozone Free and 100% safe for people and the environment.

✓ ***The only spot cooler that eliminates and kills both airborne and surface pathogens including....***

Kills - Viruses & Bacteria
Kills - Covid -19 Virus
Kills - MRSA Virus
Kills - Bird Flu (H5N1) Virus
Kills - Swine Flu (H1N1) Virus
Kills - Staph Bacteria
Kills - E.coli
Kills - C.dif
Kills - T.B.
Kills - Mold Spores

Removes - Pet Odors
Removes - Food Odors
Removes - Cigarette & Cigar Odors
Reduces - Allergens, Dust & Pollen
Controls - Gases
Controls - VOC's
Neutralizes - Static Electricity
Produces No Ozone
No Chemicals added
100% Safe for people and environment
